

Immerse Virtual Studio Signature Edition

v.1.3.0

Release notes (Mac only)

- Added Apple Music Studio giving the ability to monitor how your mixes translate on Apple Music Streaming
- Added Monitoring Sources feature: switch and level-match between additional monitoring sources and Immerse Virtual Studio
- Updated Immerse AI Engine: HRTF algorithm now incorporates facial dimensions to improve phase response and interaural time delay for clearer, tighter sound:
 - Users who have not submitted a video for their HRTF must do so to experience these improvements. If you're not sure, we recommend you create a new HRTF just in case!
- Increased Immerse Audio Bridge to 32 channels
- Minor bug fixes and UI improvements
